NAME

csvfix – fix malformed CSV data and change data format

SYNOPSIS

csvfix [OPTION]... [FILE1] [FILE2]

DESCRIPTION

Read in (possibly malformed) data from *FILE1* or standard input and output properly formed CSV to *FILE2* or standard output. csvfix can be used to change the format of a CSV file by specifying output quote and delimiter options.

-d, **--delimiter**=*DELIM*
> Use *DELIM* instead of the comma character as the delimiter character

-q, **--quote**=*QUOTE*
> Use *QUOTE* instead of double quote as the quote character

--output-delimiter=*DELIM*
> Use *DELIM* as the output delimiter instead of comma

--output-quote=*QUOTE_CHAR*
> Use *QUOTE_CHAR* as the output quote character instead of double quote

--help   Display a help message and exit

--version
> Print version information to stderr and exit
